

ANTH 3322 Topics in Anthropology: Forensic Anthropology

Term 2

Lecture time: Mondays 14:30 – 16:15 (9/1 – 17/4) NAH11

Tutorial time: Mondays 17:30 – 18:15 (9/1 – 17/4) NAH11

Instructor: Chris Cheung (christina.cheung@cuhk.edu.hk)

TA: Alvin Ao (alvin1998515@gmail.com)

Office hours: Mondays 13:00 – 14:00 NAH 322 (CC);

Wednesdays 14:30 – 15:30 NAH 406 (AA)

Textbook: Byers, SN (2017) Introduction to Forensic Anthropology. Routledge.

<https://ebookcentral.proquest.com/lib/cuhk-ebooks/detail.action?docID=4694526>

Course description: Interest in the field of forensic anthropology has been heightened in the last decade through the success of forensic-themed television shows and popular novels. This course will introduce students to the field of forensic anthropology – a scientific discipline that involves the application of methods from biological anthropology and archaeology to the identification, recovery, and analysis of skeletal remains from crime scenes, mass disasters, and unexplained death. Through lectures and in-class assignments, students will learn about the methods for recognizing and recovering evidence that allows for the determination of time since death, manner and cause of death, and the identification of individuals.

Learning outcomes:

By the end of this course, students will:

- Have a foundational understanding of basic skeletal biology, and are able to identify the bones and specific features of various skeletal elements of the adult and subadult human skeletons.
- Learn about how osteological methods can be used to create a biological profile, and help identify possible cause and manner of death.
- Gain new perspectives into the strengths and weaknesses of standard forensic anthropology methods.
- Understand the ethical issues that arise when working with human remains from a medico-legal context.

Course structure and learning activities:

One 1 hour 45 min lecture and one 45-min tutorial per week for one semester. Tutorial will take various forms, including a field trip to visit the Hong Kong Museum of Medical Sciences (pending COVID restrictions). There will be three optional sessions of “bone lab”, where students can have the opportunity to study the plastic casts more closely, and even have hands-on experience examining actual human skeletal remains. Students are encouraged to come to at least one session, but note that attendance is not required.

Course assessment and polices:

The final grade for the course is based on:

1) Lab assignments	5% x 6	30%
2) Midterm Exam 1	20%	20%
3) Midterm Exam 2	20%	20%
4) Final Exam	30%	30%

There are several in-class assignments. Each assignment will consist of written exercise to be completed during tutorial and will be based on laboratory methods commonly used in forensic anthropology. Students may work together.

The exams will be based heavily on the lecture material, and your notes from the in-class lectures will be your primary study materials. Reading the associated chapter(s) from the textbook is expected.

Submission and academic honesty

As required by the university, from Sept. 2008, students must submit a soft copy of their computer-generated text assignments to VeriGuide at a specified URL. The system will issue a receipt containing a declaration of honesty statement. Students should sign the receipt, print a hard copy of their assignment, and submit the hard copy and the receipt to teachers for grading. The university says that assignments without the receipt will not be graded.

Please check the website “Honesty in Academic Works” at:
<http://www.cuhk.edu.hk/policy/academichonesty/>

for more information on plagiarism and on how to submit papers through VeriGuide.

Grade descriptors

Grade	Overall course
A	Outstanding performance on all learning outcomes.
A-	Generally outstanding performance on all (or almost all) learning outcomes.
B	Substantial performance on all learning outcomes, OR high performance on some learning outcomes which compensates for less satisfactory performance on others, resulting in overall substantial performance.
C	Satisfactory performance on the majority of learning outcomes, possibly with a few weaknesses.
D	Barely satisfactory performance on a number of learning outcomes.

Weekly schedule (this syllabus is subject to change)

Week	Date	Lecture Topic	Chapter
1	Jan 9	1. Introduction to Forensic Anthropology	1
2	16	2. Human Osteology	2
3	23	Lunar New Year	
4	30	3. Establishing Forensic Contexts	3 and 4
5	Feb 6	4. Estimating Time Since Death	5
6	13	5. Initial Treatment and Examination	6
7	20	6. Sex Determination	8
8	27	7. Age Determination	9
9	Mar 6	Reading Break	
10	13	8. Stature Determination	10
11	20	9. Ancestry Determination	7
12	27	10. Cause and Manner of Death	11 – 14
13	April 3	11. Ante- and Post- Mortem Skeletal Conditions	15 – 18
14	10	Easter Monday	
15	17	12. Summary	19
	TBA	Final Exam	

Topics for tutorials:

Week 1: No tutorial

Week 2: Bone lab (optional)

Week 3: Lunar new year

Week 4: Bone lab (optional)

Week 5: Midterm Exam 1

Week 6: Field trip to the Hong Kong Museum of Medical Sciences (pending COVID restrictions)

Week 7: Assignment – Estimating Sex

Week 8: Assignment – Estimating Age

Week 9: Reading Break

Week 10: Assignment – Estimating Stature

Week 11: Assignment – Estimating Ancestry

Week 12: Midterm Exam 2

Week 13: Bone lab (optional) – Q&A with forensic anthropologist Winsome Lee

Week 14: Easter Monday

Week 15: Assignment – Individualization
